
DATA INTEGRATION

More and more businesses rely on integrated data which manages their business critical functions and supports decision makers across the organization. Inadequate data integration can jeopardize business intelligence initiative, ERP and data warehousing. Timewell data Integration offers your enterprise accurate, reliable and consistent data integration solution and reduces the overall cost of data integration.

We are specialized in

- ✓ ETL (Extract, Transform and Load) Specifications
- ✓ Extract, transform and load from throughout the enterprise to create trusted, reliable and accurate information
- ✓ Database management- create a integrated view of enterprise data from multiple sources
- ✓ Data quality
- ✓ Implementation Planning
- ✓ Enterprise application integration (EAI)
- ✓ Enterprise Information integration (EII)

We offer a full spectrum of data integration services from small to large sizes in diverse industries. These services include from complete life cycle development and implementation to delivery of in house client training. Our experienced consultants understand your solution will evolve with your business. Therefore, it's crucial that not only we deliver our solutions to your project, but also we take time to ensure your team has the knowledge and skills to maintain your solution.

With Timewell data integration solutions, your enterprise can:

- Maximize productivity
- Improve the quality and accuracy of your data information
- Provide a single view of your business
- Reduce the costs associated with data integration
- Reduce the risks of project delays and failures

Timewell consultants are ready to answer your questions and get you on track.
