

## DataStage

Timewell, an IT consulting firm, specializes in the design and implementation of IBM Data Integration initiatives. As an IBM consulting partner, we have strong knowledge in IBM WebSphere Data Integration products including :

- DataStage
- DataStage TX
- Quality Stage and MetaStage
- Parallel Extender
- ProfileStage
- AuditStage

DataStage, is a core component of IBM's WebSphere Integration Suite. As an ETL (Exact, Transform and Load) tool, it enables you to integrate enterprise information, regardless of the sources and targets and time frames. DataStage uses a client/server design where jobs are created and administered via a Windows client against central repository on a server.

DataStage delivers three core capabilities in enterprise data integration: easy and quick connection to any source or target system, simple administration and quick implementation and massive volume of data handling through high performance processing.

Timewell has long track record of innovative ideas demonstrates expertise in data integration and specifically in environments utilizing the IBM DataStage Integration. We provide extensive services to help you build, run, manage and optimize your DataStage applications. Timewell can assist you in any phase of your Data Integration initiative. Our DataStage consulting staffs specialize in the following :

- DataStage Implementation and Development
- EDI and Data Integration Analysis
- Data Integration/Data Warehouse Architecture
- DataStage Training and Mentoring

Timewell enables customers to capitalize on current technology and ensure maximum return on their Data Integration Suite investment. With deep understating of the technology and best practices surrounding data integration, Timewell can save clients money and time.

### DataStage Product Variants:

DATASTAGE PRODUCTS	FUNCTIONS
DataStage Standard (DataStage Server Edition)	Server and Sequence Jobs
DataStage Enterprise (Orchestrate)	Server, Sequence, and Parallel Jobs.
DataStage Enterprise MVS	Sever, Sequence, parallel, and MVS jobs
DataStage SOA (Real Time Integration Pack)	DataStage Standard or Enterprise Edition running under a Service Orientated Architecture (SOA) with real time execution of jobs as a web service, enterprise java bean or java messaging service.
DataStage TX	Formerly, Mercator. The most recent addition to the DataStage
DataStage Service Edition for PeopleSoft EPM	This is a full version of DataStage Server for a 2 CPU windows or Unixserver bundled with PeopleSoft EPM.
DataStage for PeopleSoft Accelerated Upgrades.	This is a version of DataStage Server embedded into the PeopleSoft upgrade product. (Only can be used for PeopleSoft product upgrades.)
