

## This is Timewell

### What We're Very Good At

Data Warehousing	ERP Integration
Data Integration	EDI
DataStage	ETL
Middleware Integration	Business Intelligence

### The Way We Work With You

We're collaborators, developing successful project solutions not just *for you*, but *with you*.

### The Companies We Keep

We owe our success to targeting on businesses of quality and serving them very well. This has earned us the highest expression of praise: more business from existing clients.

### The Timewell Difference

A Timewell Data Warehousing solution makes critical data easy to mine, share and use throughout your business and with your customers.

### The Benefits To You

- More empowered Marketing, Sales and Customer Service.
- More comprehensive and current financial information.
- Better integration of supplier, partner and Web data.
- Helps you overcome ETL issues.
- Better measurement of your data warehousing investment.

### Let Us Tell You More

We'd love to tell you more about how Timewell can relieve your Data Warehousing headaches and make that part of your business the picture of health.

# Timewell Practices

## Timewell and ERP

Timewell ERP consultants bring years of experience building or modifying software systems and programs so that they work efficiently for each of your departments and effectively for all of them combined.

We offer a full range of IT and management services including :

- Strategic and project planning
- Business requirements analysis
- Gap analysis
- Business process development
- Data conversion
- Post implementation support
- ... and many more.

## Timewell and EDI

Timewell EDI consultant experience includes integrating EDI with major business systems such as Oracle, SAP, JD Edwards and many others.

This includes experience in :

- DataStage TX
- Free DataStage TX introduction and assessment
- EDI/Application Integration
- EDI Strategic Planning
- EDI Program Analysis
- Training and workshops
- Data Communication setups
- Transaction Data Mapping
- Data Transformation
- Technical Maintenance and Support

We can also provide EDI VAN Planning linking you to all your trading partners.

## Timewell and DataStage

Timewell is a certified IBM consulting partner specializing in the design and implementation of IBM data integration initiatives.

This includes use of data integration products such as :

- DataStage
- QualityStage and MetaStage
- Parallel Extender
- ProfileStage
- AuditStage

... and services such as :

- DataStage Implementation and Development
- Data Integration Analysis
- DataStage Training and Mentoring

Timewell and DataStage

combine to insure maximum return on your Data Integration Suite investment.

## Timewell and ETL

The ETL process can be quite complex if not set up and maintained by those with the extensive experience to do so.

Timewell's ETL consulting services include :

- ETL systems planning and design
- Developing and choosing the most suitable architecture
- Implementation Management
- Building the ETL development/test/production suite
- Establishing a data cleaning subsystem
- Evaluating tradeoffs among various data staging structures
- Analyzing and extracting source data

We are also familiar with and regularly use over 13 different ETL tools.(See our website for a complete list.)

## Timewell and Middleware

Middleware programs link or mediate between two or more separate programs. It is essential in transforming mainframe applications to clients/server applications and to provide for communications across heterogeneous platforms.

Timewell can design an architecture based on the product that you want to deliver, and develop a prototype to confirm that the product works and scales.

Also, Timewell middleware solutions allow you to control technologies such as :

CORBA	JAVA
EJB	Microsoft Biztalk Server
IBM WebSphere	XML
J2EE	

## Timewell and Data Integration

Today, data integration is an essential component within all business operations.

With Timewell data integration solutions, you can :

- Get a comprehensive view of your business
- Reduce the risks of project delays
- Reduce data integration costs
- Improve data integration quality and accuracy
- Increase productivity

Timewell will also work side-by-side with you for as long as necessary to insure that your organization has the skills to maintain your data integration function thereafter.
